

KAWAKAWA BALM

100% Natural Moisturiser

www.maramatuku.com

WHAT IS IT?

100% Natural balm. Kawakawa is a native shrub to Aotearoa. Scientific name *Piper excelsum*. From the pepper family. Commonly identified as a leaf that looks like a heart with holes in it.

IN MORE DETAIL

Kawakawa has 2 active chemical compounds:

Myristicin is psychoactive and anti-inflammatory, which means that it removes toxic inflammatory chemicals such as nitric oxides in human cells.

Diayangambin is an immunosuppressant. This means it is a useful treatment for autoimmune disorders, where the body's immune system attacks the body's own useful, living tissue.

High levels of Vitamin C
